DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, 14-15, 17-23 and 25, drawn to a printing control apparatus for controlling a printer having a stapling function, classified in class 270, subclass 58.07.
 - II. Claims 13, 16, 24 and 26, drawn to a printing control apparatus for controlling a printer having a plurality of paper feed units, classified in class 400, subclass 62.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the printing control apparatus which includes paper feed unit designation means, paper feed unit setting means of **group II** does not require the use of a stapling position setting means in **group I** to be operative. The subcombination has separate utility such as for a copy machine.

Art Unit: 2854

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to MINH H CHAU whose telephone number is 703-305-0298. The examiner can normally be reached on M-F 8AM - 4:30 PM.
